Forced to Use Universal Jobmatch?
Universal Automation is a Chrome browser extension which will automatically search and apply for jobs on Universal Jobmatch. With a little bit of care it can help you save a lot of time.

To try it, follow these simple steps:
1. You need to use Google Chrome browser. Start it and open this page: **http://bit.ly/ujextension**
2. Click on the blue "FREE" button in the top right corner to install the extension.
3. Open Chrome menu, click on Tools and then on Extensions. On the page with the list of extensions click on Options next to Universal Automation.
4. Provide your Universal Jobmatch account details and job search settings and click Save. If you are mandated to use UJ by the jobcentre, you should create a second UJ account and try the extension with it first.
5. Click on the extension icon in the browser toolbar. When the page opens click on Start button. The extension will now log you in to UJ and apply for as many jobs matching your search settings as possible.
